

## PTVSHC1TF12VBH

### **Bi-directional 12V High Capacitance TVS Protector**

#### **Description**

The PTVSHC1TF12VBH transient voltage suppressor is designed to replace multilayer varistors (MLVs) in portable applications such as cell phones, notebook computers, and PDA's. They feature large cross-sectional area junctions for conducting high transient currents, offer desirable electrical characteristics for board level protection, such as fast response time, lower operating voltage, lower clamping voltage and no device degradation when compared to MLVs. The PTVSHC1TF12VBH protects sensitive semiconductor components from damage or upset due to electrostatic discharge (ESD) and other voltage induced transient events. The PTVSHC1TF12VBH is available in a SOD-123FL package with working voltages of 12 volt.

#### Feature

- 4400W peak pulse power per line (t<sub>P</sub> = 8/20µs)
- SOD-123FL package
- Protect one I/O or power line
- Low clamping voltage
- RoHS compliant
- Transient protection for data lines to IEC 61000-4-2(ESD) ±30kV(air), ± 30kV(contact); IEC 61000-4-5 (Lightning) 200A (8/20us)

#### SOD-123FL(Top View)

**Circuit Diagram** 

Marking (Top View)

#### **Applications**

- Cell phone handsets and accessories
- Personal digital assistants (PDA's)
- Notebooks, desktops, and servers
- Portable instrumentation
- Cordless phones
- Digital cameras
- Peripherals
- MP3 players

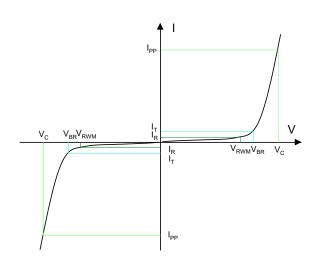

#### **Mechanical Characteristics**

- Lead finish:100% matte Sn(Tin)
- Mounting position: Any
- Qualified max reflow temperature:260°C
- Device meets MSL 1 requirements
- > Pure tin plating:  $7 \sim 17$  um
- ➢ Pin flatness:≤3mil

# PTVSHC1TF12VBH

## **Electronics Parameter**

| Symbol           | Parameter                                  |  |  |  |
|------------------|--|--|--|--|
| V <sub>RWM</sub> | Peak Reverse Working Voltage               |  |  |  |
| I <sub>R</sub>   | Reverse Leakage Current @ V <sub>RWM</sub> |  |  |  |
| V <sub>BR</sub>  | Breakdown Voltage @ I <sub>T</sub>         |  |  |  |
| Ι <sub>Τ</sub>   | Test Current                               |  |  |  |
| I <sub>PP</sub>  | Maximum Reverse Peak Pulse Current         |  |  |  |
| V <sub>c</sub>   | Clamping Voltage @ I <sub>PP</sub>         |  |  |  |
| P <sub>PP</sub>  | Peak Pulse Power                           |  |  |  |
| CJ               | Junction Capacitance                       |  |  |  |

### Solder Reflow Recommendation

Remark: Pb free for 260°C; Pb for 245°C.

#### PCB Design

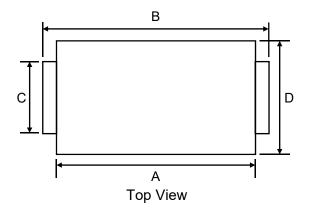

For TVS diodes a low-ohmic and low-inductive path to chassis earth is absolutely mandatory in order to achieve good ESD protection. Novices in the area of ESD protection should take following suggestions to heart:

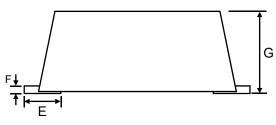

- > Do not use stubs, but place the cathode of the TVS diode directly on the signal trace.
- > Do not make false economies and save copper for the ground connection.
- > Place via holes to ground as close as possible to the anode of the TVS diode.
- > Use as many via holes as possible for the ground connection.
- ➤ Keep the length of via holes in mind! The longer the more inductance they will have.

#### **Ordering information**

| Device         | Package             | Reel | Shipping           |
|----------------|---------------------|------|--------------------|
